1. **PURPOSE**

1.1 This policy sets out the principles for managing issues around the misuse of drugs, alcohol, smoking and other substances in order to ensure a fair, reasonable and consistent approach. Employees have a contractual obligation to report to work free of alcohol, drugs or other substances. Employee’s behaviour which falls short of acceptable standards in this respect will be referred to the disciplinary process; or where mitigating circumstances apply a supportive environment will be provided in line with the procedure in this policy. The policy aims to:

- set out the rules regarding the use of intoxicating substances and ensure employees are aware of the likely consequences to their employment if misusing them.
- create a climate that encourages employees who may be misusing substances to come forward, seek help and accept treatment.
- provide a framework to enable instances of misuse to be handled in an appropriate, confidential and consistent manner.
- promote a healthy and safe working environment.

1.2 This policy covers habitual alcohol or substance misuse where the employee is dependent on the effects of the substance, to the extent that the drinking or drug taking becomes a dominant concern in their lives and to the detriment to others. In this instance appropriate support will be offered in line with this policy and applied with dignity and respect. It is the employee’s responsibility to comply with rehabilitation recommendations or the Disciplinary Policy and Procedure will be invoked. The policy excludes indulgence in alcohol or substance misuse which affects health and safety in the workplace where there is not an underlying dependency. In this instance the Disciplinary Policy and Procedure will be invoked. Inappropriate use of alcohol or substances may be regarded as gross misconduct.

1.3 The organisation has a general duty under the Health & Safety at Work Act 1974 to ensure, as far as is reasonably practicable, the health, safety and welfare of its employees and others. Employees also have a duty to co-operate with and implement their employer’s policies in this respect so there is shared ownership of health and safety. The organisation recognises that health and safety may be put at risk by employees who misuse alcohol, drugs or other substances to such an extent that their health, work performance, conduct and working relationships are adversely affected. A zero tolerance approach will therefore be taken with regards to abuse relating to this policy.

1.4 It is an offence under the Misuse of Drugs Act 1971 for an employer to allow its premises to be used for the production, supply or possession of controlled drugs and reasonable action to prevent this should be taken. The organisation also has a legal duty to ensure that its workplace is smoke free; therefore smoking is banned on the organisations grounds and premises.

2. **SCOPE**

2.1 The policy applies to all employees of the organisation in addition to contractors, agency staff, honorary appointment, volunteers and visitors.
3. **EQUALITY STATEMENT**

3.1 In applying this policy, the organisation will have due regard for the need to eliminate unlawful discrimination, promote equality of opportunity, and provide for good relations between people of diverse groups, in particular on the grounds of the following characteristics protected by the Equality Act (2010); age, disability, gender, gender reassignment, marriage and civil partnership, pregnancy and maternity, race, religion or belief, and sexual orientation, in addition to offending background, trade union membership, or any other personal characteristic. An Equality Impact Assessment is used for all policies and procedures.

4. **ACCOUNTABILITY**

4.1 The Chief Officer is accountable for this policy.

5. **IMPLEMENTATION AND MONITORING**

5.1 The Assurance Committee is responsible for formal approval and monitoring compliance with this policy. Following ratification the policy will be disseminated to employees via the intranet.

5.2 The policy and procedure will be reviewed periodically by the Senior Management Team in conjunction with Human Resource and Trade Union representatives where applicable. Where review is necessary due to legislative change, this will happen immediately.

6. **RESPONSIBILITIES**

6.1 Good working relations are vital for the organisation to operate successfully and provide services. There is a joint responsibility for management, trade unions and employees to accept the responsibility of working together on issues in good faith and with the shared intention of facilitating good working relations.

6.2 Employees

6.2.1 It is the responsibility of employees to ensure that they:

- report for work and remain in a condition to perform their duties free from the effects of alcohol, drugs or any other substance, whether on organisation premises or external locations.
- inform their line manager or another appropriate manager if they have an alcohol or substance misuse problem.
- co-operate with any support and assistance provided by the organisation to address an alcohol or substance misuse problem.
- inform an appropriate manager or a HR representative if they know or strongly suspect that another employee is under the influence of alcohol or drugs at work.
- encourage colleagues to take personal responsibility should they have an alcohol, drug or substance misuse problem.
- to comply with relevant codes of conduct including professional codes of conduct.

6.3 Line Managers

6.3.1 It is the responsibility of line managers to ensure that they:

- make sure employees understand the policy and are aware of the rules and consequences regarding the use of alcohol, drugs and other substances.
• provide advice to employees in relation to their roles and responsibilities under this policy.
• are alert to any changes in behaviour which may indicate alcohol, drug and/or substance misuse and to monitor performance, attendance and sickness absence (See Appendix 1 – Signs of Alcohol/Drugs/Substance Misuse).
• obtain advice from a HR representative in managing a situation where an employee is misusing alcohol, drug and/or substance.
• promote an open and honest culture where employees feel able to take personal responsibility for their own health and safety in relation to alcohol, drug and/or substance misuse and support others to do so.
• encourage employees to seek help voluntarily.
• provide support to employees who are being rehabilitated and engage appropriately with Occupational Health in relation to supporting an individual with a problem and enabling them to continue to carry out their role.
• identify and refer disciplinary matters connected to the misuse of alcohol, drugs, substance misuse and smoking as appropriate.

6.4 Human Resources Team

6.4.1 The Human Resource representative will provide advice and support on all aspects of this policy to ensure application and support.

7. PRINCIPLES

7.1 Alcohol, Drugs and Substance Misuse

7.1.1 It is prohibited for employees to report to work while unfit because of alcohol, drug and/or substance misuse. This includes heavy consumption the night before work, employees should be aware of the time it takes for alcohol to leave their system. If an employee finds they are unfit for duty due to unforeseen exceptional circumstances they should contact their line manager by phone to discuss the options. Annual leave or unpaid leave will be taken.

7.1.2 Where an employee is under the influence of alcohol, drug and/or substance misuse, and, in the opinion of a manager (using Appendix 1 as a guideline), is not fit to be at work, the employee will be instructed not to attend work until fit to do so. Employees will be considered unfit for work if they attend work smelling of alcohol. Employees must not consume alcohol or substances at any time whilst at work regardless of location, including during breaks (i.e. lunch). These instances will be investigated under the Disciplinary Policy and Procedure if they are not related to an underlying dependency problem.

7.1.3 Employees must not bring alcoholic drinks on the premises for consumption. The organisation actively discourages the purchase of alcohol as gifts for colleagues and endorses non-alcoholic alternatives as gifts. Any alcohol brought onto organisation premises as gifts for colleagues should be stored responsibly, i.e. out of sight.

7.1.4 The organisation prohibits the possession, transfer, sale or use of unauthorised drugs, or illegal substances on its premises. Any employee found to be in possession of an illegal substance will be suspended from duty and a full investigation will be carried out under the disciplinary procedure. Under the Misuse of Drugs Act 1971, the organisation has a duty to deal with such issues and all drug related issues will be reported to the police and could lead to criminal proceedings.
7.1.5 Employees must not drive whilst under the influence of any intoxicating substance. This includes driving to/from work and during work time. It should be noted that some prescribed medication will also affect an individual’s ability to drive safely, it is the employees responsibility to seek advice from their GP if required.

7.1.6 If a colleague has reasonable grounds to suspect an employee has an alcohol, drug and/or substance misuse problem that affects the health and safety of any employee or the employee’s performance, they should inform the employee’s manager. There will be no repercussions on the individual raising concerns. Employees who attempt to cover up in a work situation for a colleague who puts themselves, others or the reputation of the organisation at significant risk will leave themselves open to disciplinary action.

7.2 Prescribed Medicines

7.2.1 It should be recognised that both prescribed and over-the-counter medicines may cause impairment to an employee’s performance at work. Employees should seek advice from their GP or pharmacist on any medicines they are taking and not exceed the recommended dose. Employees should be encouraged to discuss any problems with Occupational Health if they feel this would be helpful and take responsibility for ensuring they are fit to be at work. They should inform their line manager of any possible side effects of their medication. For example, it could have serious impact on driving during the course of work and/or affect their work performance. Please seek HR advice.

7.3 Smoking

7.3.1 Smoking is prohibited at work anytime on the organisations premises. This includes the use of electronic cigarettes. If employees are smoking on work premises action will be taken under the disciplinary policy and procedure.

7.3.2 Employees who smoke are encouraged to seek support to quit.
- Information on smoking – smokefree.nhs.uk or call 0800 848484 – 24 hour helpline. www.canstopsmoking.com

8. PROCEDURE FOR DEALING WITH ALCOHOL, DRUG AND SUBSTANCE MISUSE ISSUES

8.1 Alcohol, drug and substance misuse issues are recognised as health issues which may affect an employee’s capability to carry out their duties. The organisation will treat all employees that have a misuse problem in an empathetic and consistent manner and every reasonable effort will be made to deal with them accordingly and make the same provisions for treatment as for any other illness, at the same time maintaining a safe environment for employees, patients and visitors. Where the employee accepts responsibility for their behaviour and agrees to seek help, the matter will be dealt with in line with this policy. Where they do not accept responsibility or do not agree to follow/sustain a rehabilitation programme, action will be taken under the disciplinary policy. Please see the flow chart in appendix 2.

8.2 Dealing with a Concern

8.2.1 Alcohol, drug and substance misuse may come to the attention of a manager in several ways, for example directly from the employee concerned, through information supplied by a colleague, misconduct or absenteeism and/or through deterioration in work performance (please see appendix 1 for further signs). It is important that there
is early intervention by appropriate senior managers when alcohol or substance abuse is suspected and it is affecting an individual’s work performance. Further advice can also be sought from HR or occupational health.

8.2.2 Any employee arriving or returning to work who is suspected of having consumed alcohol at or before work, or being under the effects of drugs or substances should be removed from duty immediately. The employee should not drive in line with the Road Traffic Act 1988 and should make alternative arrangements to get home safely.

8.2.3 Once aware of a suspected problem, the manager should meet with the employee at the earliest opportunity to raise the concerns and establish if there is an underlying alcohol or substance misuse problem. They should also establish if there are any other issues affecting their performance or conduct. If the employee admits to having a misuse problem a referral will be made under occupational health and the misuse will be dealt with as a health condition. If the employee does not accept that they have an alcohol, drug and/or substance misuse problem action will be taken in line with the Disciplinary Policy and Procedure.

8.3 Occupational Health

8.3.1 The Occupational Health Service will offer support and advice to the employee; they may arrange referrals to other agencies with the employee’s consent, monitor progress and, subject to the rules of confidentiality, provide advice for the manager regarding the fitness to work for the employee. They cannot treat an individual for an alcohol, drug and/or substance misuse problem. They will not be able to carry out immediate/urgent testing to ‘prove’ that an individual is unfit for work due to alcohol, drug and/or substance misuse if an individual’s manager suspects it.

8.3.2 The Occupational Health Service will carry out confidential assessment of such health issues in relation to an individual’s work and responsibilities. There will be an appropriate and ethical exchange of information which takes into account the sensitive nature of the condition between involved parties so that advice about fitness to work or role adjustment according to health status can be provided.

8.3.3 At the Occupational Health Service clinicians’ discretion, when an individual has been seen in Occupational Health Service and is returning/continuing to work, testing of biological specimens (e.g. urine and breath testing) may infrequently be suggested and only arranged with the individual’s consent. For drug testing there will be strict adherence to acknowledged correct procedure.

8.3.4 Employees are required to attend occupational health appointments in line with this procedure. The line manager will make a referral to occupational health giving full background to the case.

8.3.5 If the Occupational Health Service does not confirm the existence of an alcohol, drug and/or substance misuse problem, or any other health condition, the manager should make an assessment on the basis of the information that they have available to them and decide whether it is appropriate to commence an investigation in line with the Disciplinary Policy and Procedure or to deal with the matter under the Managing Concerns with Performance Policy.

8.3.6 If the Occupational Health Service confirms the existence of an alcohol, drug and/or substance misuse problem, they may refer the employee to their GP or direct them towards an appropriate agency (e.g. Drink/Substance misuse support services). The organisation accepts that provided an employee who has been identified or who is
recognised as suffering from alcohol, drug and/or substance misuse is prepared to accept responsibility and undergo an appropriate form of treatment programme, continued employment with the organisation will be maintained where possible during such treatment.

8.4 **Treatment Programme**

8.4.1 Where a misuse problem is identified occupational health will refer the employee to an appropriate agency/GP to follow a treatment programme. This may include counselling, in-patient detox and rehabilitation followed by extended outpatient therapy and or self help groups and medication. This will be managed in line with the Managing Sickness Absence Policy and medical advice will be sought regarding their fitness for work. Reasonable time off for rehabilitation or counselling should also be discussed and regular contact made. The employee must take responsibility for following the treatment programme.

8.4.2 If the treatment programme is discontinued or there is repeat misconduct by the employee where treatment suggested by Occupational Health Service/GP has not been accepted or followed; disciplinary action will be taken, which could result in a formal warning up to and including dismissal.

8.4.3 Where misuse is not eliminated or controlled sufficiently to allow resumption of normal working arrangements within a reasonable period of time or, if appropriate, using the appropriate support services, and no suitable alternative employment can be found, the matter will be dealt with as an issue of capability on ill health grounds or, if appropriate, discipline.

8.4.4 Following successful treatment the employee should be supported as much as possible back into the workplace with the advice of occupational health considering the risk of relapse. Continued awareness from the manager will be required in case of a relapse and continued support should be provided. Managers are expected to monitor performance and/or absenteeism during a period of rehabilitation. The manager should inform the employee of performance and/or attendance expectations and it should be emphasised appropriate policies will be followed if required.

9. **RELATIONSHIP TO OTHER POLICIES**

9.1 **Managing Sickness Absence Policy**

9.1.1 Where a problem has been identified with an employee, the line manager should ensure that any steps to deal with the matter are consistent with the organisation’s Managing Sickness Absence Policy where this is a health matter. Employees have a responsibility for keeping their manager informed of any medical or other condition or any other factor which might affect attendance; e.g. taking prescribed medication.

9.2 **Disciplinary Policy and Procedure**

9.2.1 Clear reference is made in the organisation’s Disciplinary Policy regarding being unfit for duty through alcohol or drug abuse which is likely to be regarded as gross misconduct and which may result in summary dismissal. Whilst employees with an issue of alcohol, drug and/or substance misuse should be regarded as suffering from an illness and treated accordingly, there may be occasions when such employees commit offences of misconduct for which disciplinary action is the necessary outcome. Prior to any consideration of disciplinary action, an investigation of the circumstances will take place in accordance with the Disciplinary Policy and
Procedure. Due consideration will be given to whether the employee has sought treatment or help.

9.3 **Managing Concerns with Performance Policy**

Managers should seek HR advice on the individual circumstances of each case to understand when it is appropriate to instigate the Managing Concerns with Performance Policy. In instances where an employee who is being managed under the Managing Concerns with Performance Policy; where the effect of drugs or alcohol misuse has an impact on this performance concern. Then initially you would refer this to the Alcohol and Drugs and Substance Misuse policy for support and seek Occupational Health advice. If following this support there is still an ongoing issue or concern with performance. You may then refer the issue or concern back to the Managing Concerns with Performance Policy and manage it under capability.

9.4 **Health and Safety Policies**

9.3.1 Under the Health and Safety at Work Act (1974) The organisation has a duty to ensure the health, safety and welfare at work of all its employees and other persons including visitors and contractors using the premises. Similarly employees have a duty to take reasonable care for the health and safety of themselves and all other persons who may be affected by their acts or omissions at work. Health and Safety and the impact on the service must be taken into consideration where an employee is known to have a problem related to alcohol, drug and/or substance misuse which could potentially affect the way he/she works. The Workplace (Health, Safety and Welfare) Regulations requires that employers shall make suitable and sufficient assessment to the risks to the health and safety of its employees, to which they are exposed whilst at work. Where risks are foreseeable the employer has a duty to devise measures which provides a safe work place.
SIGNS OF ALCOHOL/DRUGS/SUBSTANCE MISUSE

Signs of alcohol/substance misuse are not always obvious and may be confused with other conditions or problems. It is sensible to bear in mind the possibility of alcohol/substance misuse when the following behaviours are observed (this list is not exhaustive).

Please note that not all people with alcohol/drugs/substance misuse problems display all these behaviours. Some of these behaviours may also indicate other problems which are not associated with alcohol/drugs/substance misuse. If in doubt, contact the Occupational Health Service and/or Human Resources for advice.

- Abnormal fluctuations in mood and energy, irritability, impaired concentration, lethargy
- Tendency to become confused
- Poor timekeeping
- Repeated absences for trivial or inadequate reasons
- Increase in short-term sickness absence
- Impairment of job performance
- Accident proneness, increased incidence of mistakes or errors of judgement
- Deterioration of relationships with other people
- Dishonesty and theft (arising from the need to maintain an expensive habit)
- Hand tremors, slurred speech, facial flushing, bleary eyes, poor personal care and hygiene
- Smelling of alcohol or other substances
Appendix 1

Flowchart:

Employee with a potential problem / issue relating to alcohol/drugs/substance misuse

Employee requests help voluntarily before the issue is identified at work

Line manager identifies/or is made aware of a reasonable concern/potential problem

Line manager raises concern with employee

Concern relates to a dependency on alcohol/drug/substance misuse

Concern does not relate to a dependency on alcohol/drug/substance misuse

Refer issue to the disciplinary policy

Refer to occupational health for support and manage under the Managing Sickness Absence Policy

Employee rejects offer of help via occupational health

Refer issue to the disciplinary policy

Employee accepts help and consequent referral to occupational health

Substance misuse problem confirmed

Referral to GP/appropriate agency made for treatment programme

Treatment programme rejected and concerns continue

Refer issue to the disciplinary policy

Treatment programme accepted and commenced

Treatment programme discontinued/repeat misconduct or not met in a reasonable timeframe and issues continuing

Refer issue to the appropriate policy, disciplinary, performance or sickness

Treatment programme successfully completed

Supported rehabilitation back into work and monitor behaviour/performance

Referred back to line manager, consider if referral to the disciplinary policy or managing concerns with performance policy appropriate

No substance misuse problem confirmed
# Equality Impact Assessment

## 1. Outline

**Give a brief summary of the policy**

To provide a process and framework for support to managers and employees in dealing with cases of alcohol and substance misuse by employees at the workplace.

**What outcomes do you want to achieve**

Support staff with misuse problems to seek treatment and make a successful return back to work.

## 2. Evidence, data or research

**Give details of evidence, data or research used to inform the analysis of impact**

The impact assessment is informed and supported by a holistic performance framework for equality and diversity across the suite of HR policies.

## 3. Consultation, engagement

**Give details of all consultation and engagement activities used to inform the analysis of impact**

## 4. Analysis of impact

This is the core of the assessment, using the information above detail the actual or likely impact on protected groups, with consideration of the general duty to;

- eliminate unlawful discrimination;
- advance equality of opportunity;
- foster good relations

<table>

If any negative/positive impacts were identified are they valid, legal and/or justifiable? Please detail.

No anticipated detrimental impact on any equality group. The policy is applicable to all employees and adheres to the NHS Litigation Authority Standards, statutory requirements and best practice. Makes all reasonable provision to ensure equity of access to all employees. There are no statements, conditions or requirements that disadvantage any particular group of people with a protected characteristic.
### 4. Monitoring, Review and Publication

<table>
<thead>
<tr>
<th>How will you review/monitor the impact and effectiveness of your actions</th>
<th>Will monitor cases of alcohol, smoking or substance misuse at workplace on the caseload analysis by protected characteristic. Clear distinctions should be made between those people who take prescription drugs and the causes/possible effects of this and actual substance misuse.</th>
