

I've attended my cervical screening (smear test) appointment

If you've attended your cervical screening appointment please sign below and encourage other women to attend

35

Cervical cancer is the most common cancer in women under the age of 35

15

Usually there are no symptoms of cervical cancer at an early stage which is why it's important that you attend your regular screening

4 out of **5** women take up their cervical screening (smear test) appointment

**15 minutes that could
SAVE YOUR LIFE**
